

ECOSEAL+™

Draw the line on efficiency.

A better building envelope means a better home for your customers. And Knauf Insulation EcoSeal+ water-based elastomeric sealant is your best option for energy-saving performance and sustainability.

EcoSeal+ is safe

- Water based; contains no solvents
- No hazardous materials
- Zero Volatile Organic Compounds
- No CFC's or HCFC's used in manufacturing or installation

EcoSeal+ provides exceptional performance¹

- Meets building code requirements for top plate gasket
- Air leakage resistance exceeds EPA Energy Star requirements²
- Superior thermal performance — assured R-values
- Sound Transmission Class (STC) values beat foam³

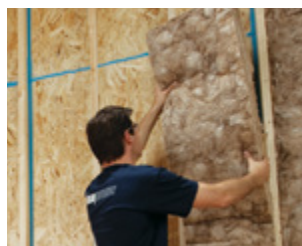

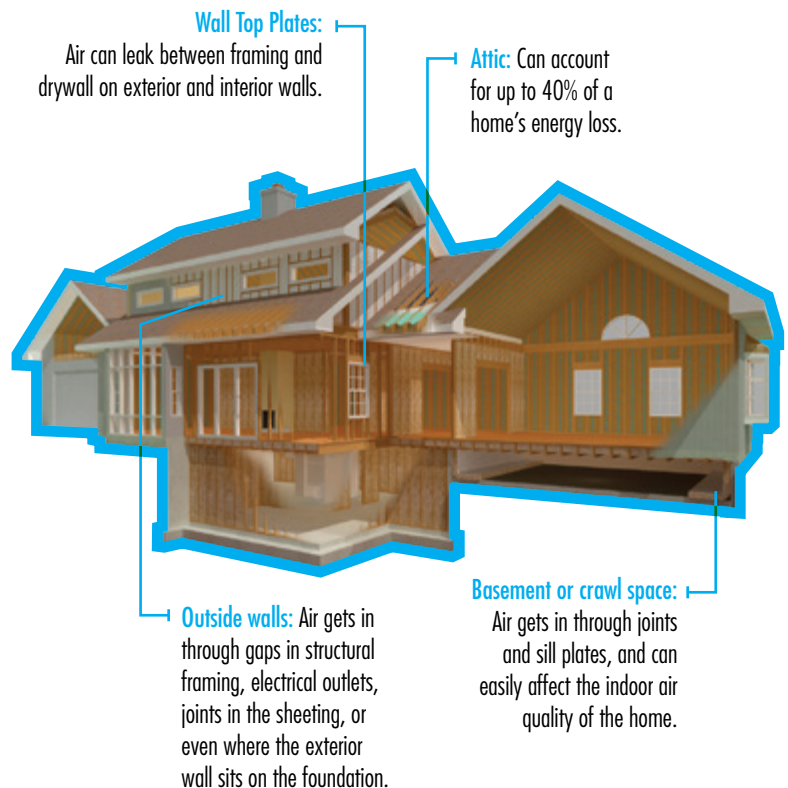

EcoSeal+ supports green building initiatives

- LEED Eligible Product
- No off-gassing, greater indoor air quality

EcoSeal+ is cost-effective

- Enables you to offer your clients a higher performance home at a lower cost
- Contributes to a more energy-efficient home

Protect your homes from air infiltration and energy loss with EcoSeal+.

Specify EcoSeal+ as part of the EcoSeal+ System for your next project.
